

## START YOUR ENGINES

The new **Group 27 BlueTop** is the latest addition to the **Optima Batteries** product family. The use of Spiralcell Technology in construction cuts down on vibration, while solid-cast cell connections increase durability. Despite their smaller size, these batteries can power stereos, GPS systems, bilge pumps, fish finders and other high-demand electronics while maintaining plenty of cranking power. The batteries also offer faster recharging, are completely spill-proof and may be mounted in almost any position. Starting at **\$199; [optimabatteries.com](http://optimabatteries.com)**
