

**OPTIMA® BlueTop Spiralcell** AGM high-performance batteries are now available in size group 27. The addition of this size completes the full line of OPTIMA marine batteries, which also includes group 34/24 and group 31. Dual-purpose batteries like the BlueTop provide power for stereos, GPS systems, bilge pumps, fish finders and other high-demand electronics while still providing plenty of cranking power to start the motor. The patented Spiralcell Technology provides up to two times longer life than traditional batteries, allowing an OPTIMA to withstand up to 350 discharge/recharge cycles and still deliver a high percentage of the original capacity. In addition to longer life, OPTIMA batteries are 15 times more vibration resistant than flat-plate batteries, which enables them to endure the roughest waters at high speeds. All OPTIMA batteries are maintenance-free and completely spill-proof. Ask your dealer for the unique colored top and six-pack design, or contact: OPTIMA Batteries, Dept. FFG, 5757 N Green Bay Rd., Milwaukee, WI 53209; (888) 867-8462; [www.optimabatteries.com](http://www.optimabatteries.com)
